

The Berkeley Springs Water Works is asking for your assistance and helping us with the verification of service lines in our water system. The EPA is mandating all Water Systems in the United States to verify and document all Public and Private water service lines. The West Virginia Bureau for Public Health has created a Service Line Inventory Spreadsheet to list the information required by the EPA for the Water Systems to stay in compliance. We ask you to share this information to help us fill out the Service Line Inventory, mandated by the EPA. Please check all that is applicable and return to the office, or if you prefer, mail it back. Thank you in advance.

Physical Address: _____

City: _____

Signature: _____

Account Number: _____

Year Home Built: _____

Line inside Structure:

Copper Galvanized Plastic Lead

Line from Meter to Structure (in ground):

Copper Galvanized Plastic Lead

(In ground) line size:

3/8 1/2 5/8 3/4 1 1-1/4 1-1/2 1-3/4

YEAR (in ground) line was installed or replaced.

Before 1988 After 1988

Yes No. Would be willing for Water System to sample for Lead & Copper
